 - and many more

Why Choose BlackBerry? (Top 10 Reasons)

BlackBerry® is your email - Email is automatically delivered to your smartphone using 'push' technology. Compose, send, receive and manage messages and open attachments in popular file formats.

Real-time synchronisation - Emails, calendar, contacts, tasks and memo pad synch 'over the air' with your desktop PC.

It's easy to use - all BlackBerry smartphones feature intuitive hardware and software design.

It's so much more than email on the move - A growing range of industry-specific applications are available to meet the individual requirements of your business.

Access corporate data - Access back office systems such as SAP, Oracle, Siebel or Remedy and increase productivity immensely.

It's easy to implement - BlackBerry integrates seamlessly with leading email platforms, requiring minimal IT resources to maintain.

It's secure - Two way encryption, an operating system optimised to repel viruses and individual smartphone security means you can rely on BlackBerry to keep your data secure.

It's affordable, at any size - Designed to meet the needs of all businesses, BlackBerry delivers wireless communications without the need for costly IT support.

It's global reach - BlackBerry quad-band smartphones can be used around the world and are available from over 95 wireless networks in over 40 countries.

It delivers proven return on investment - BlackBerry is cost effective, durable and easy to deploy, providing an average ROI of nearly 200%, and a pay back of less than seven months.
